LEAN CANVAS — SDG 4: QUALITY EDUCATION

Smart Learning Support: An Accessible Digital Learning Platform

1. PROBLEM

• Students have different learning speeds and
receive enough individual support.
• Quality learning resources can be difficult to
some students.
• Students may need a simple way to practise
track their learning progress.

2. SOLUTION

• Create a simple web-based learning platfor
notes and quizzes.
• Provide practice questions with instant feedback.
• Track quiz scores so learners can identify topics that need revision.
• Use a clean, mobile-friendly interface and accessible content.

3. UNIQUE VALUE PROPOSITION

A simple, accessible learning companion tha
notes, practice quizzes and progress tracking

4. UNFAIR ADVANTAGE

• Designed around learner feedback
• Topic-wise learning and practice in one wor
• Can be expanded with local-language resou
• Educational prototype with low-cost, widely

5. CUSTOMER SEGMENTS

• School and college students
• Teachers and tutors
• Educational institutions
• Learners who need flexible revision resources

6. KEY METRICS

• Quiz completion rate
• Improvement between practice attempts
• Active learners and repeat visits
• User satisfaction feedback
• Page load and response time

7. CHANNELS

• College and school demonstrations
• Teacher and student communities
• Educational clubs and workshops
• Web link shared through institutions

8. COST STRUCTURE

• Platform design and development
• Content preparation and review
• Testing and accessibility checks
• Hosting and maintenance

9. REVENUE / SUSTAINABILITY

• Free academic prototype initially
• Possible institutional subscription in future
• Possible sponsorship or grants for access (future scope)

SDG connection: Supports inclusive and equitable quality education and lifelong learning. This is a proposed academic prototype; impact should be evaluated through user testing.
